DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to an optical machine for creating an image of a master object on a format plane, classified in class 355, subclass 54.
 - II. Claims 23-37, drawn to a reflecting optical system, classified in class 355, subclass 67.
 - III. Claims 38-41, drawn to a method for transferring images , classified in class 430, subclass 311.
 - IV. Claim 42, drawn to a system for recording images on a recording web, classified in class 355, subclass 47.
 - V. Claim 43, drawn to a system for providing precision images of the object on a photomask, classified in class 355, subclass 53.
 - VI. Claim 44, drawn to an optical projection system, classified in class 355, subclass 53+.
 - VII. Claim 45, drawn to a method of providing high precision images on an optical recording medium, classified in class 430, subclass 311+.
 - VIII. Claim 46, drawn to a method of optically reproducing the image of a master element, classified in class 430, subclass 320.
 - IX. Claim 47, drawn to a method of creating at a format plane the image of a master object , classified in class 430, subclass 311+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, IV, V and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the above inventions have separate utility such as images transferred from a rigid photomask/ or intermittently photomask to a web format, distortion control, magnification control, automatic focusing, etc... See MPEP § 806.05(d).
3. Inventions I, II, IV, V, VI and III, VII, VIII, and IX and are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another different apparatus such as scanner, or electrostatic imaging system.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
